

## ISE Nitrate Sensor for Hydrolab water quality Sondes

ISE Nitrate Sensor for Hydrolab Sondes. ISE is a reference electrode immersed in a solution of fixed ion concentration separated by a membrane containing a chemical compound that reacts with the ion of interest, measuring electrical potential that varies with concentration.

| Nitrate Sensor |                             |
|----------------|-----------------------------|
| Range          | 0 100 mg/L-N                |
| Accuracy       | Greater of ± 5% of reading, |
|                | or ± 2 mg/L-N               |
| Resolution     | 0.01 mg/L-N                 |
| Max Depth      | 15 m                        |
