

### temperature sensors in water quality sondes and level gauges

The Hydrolab temperature sensor is a variable resistance thermistor. The temperature sensor is included with every Hydrolab sonde.

| Temperature |              |
|-------------|--------------|
| Range       | -5 ... 50 °C |
| Accuracy    | ± 0.10 °C    |
| Resolution  | 0.01 °C      |
