Technical Data Turbidity Sensor

Self-cleaning turbidity water quality sensor from Hydrolab

Hydrolab sondes use a self-cleaning turbidity sensor that measures from 0 to 3000 NTU and includes a user-programmable cleaning system to remove fouling or debris that could potentially affect readings.

Turbidity Sensor	
Range	0 3000 NTU
Accuracy	\pm 1% up to 100 NTU, \pm 3% from 100 \parallel 400 NTU, \pm 5% from 400
	3000 NTU
Resolution	0.1 NTU from 0 [400 NTU; 1 NTU for >400 NTU
