

# OTT Hydras 3 LT Pocket

The new formula for success in qualitative hydrometry

Hydrological user software for Pocket PCs

# Data handling – mobile, simple and robust

**OTT** Hydras 3 LT Pocket is the new user software for Pocket PCs, with which you can operate Hydrolab **multi-parameter probes** of **Series 4a and 5** simply and quickly.

An RS-232 connection provides the communication between Pocket PC and multi-parameter probe. You can configure your probe and calibrate the individual parameters on location. The clearly structured and easy to understand interface of the OTT Hydras 3 LT Pocket helps in this respect.

Running measurements can be read immediately from the display of the Pocket PC. Later, the data recorded can be transferred to a standard PC and processed further there, e.g. with the communication software OTT Hydras 3 Basic, which is an ideal addition. From there you can also export the data to standard programmes such as Microsoft Excel or into an existing database.

## System requirements

- Pocket PC with RS-232 interface or RS-232 adapter; ARM compatible processor (for example, Intel® XScale™, Samsung S3C 2440); clock frequency  $\geq 300$  MHz; working memory  $\geq 64$  MB; operating system: Windows Mobile 2003 (Pocket PC 2003); synchronization software Microsoft ActiveSync from Version 3.7;
- IBM compatible standard PC (notebook/desktop) with Microsoft Windows 98 or later operating system;

## Scope of supply

- Extremely robust Pocket PC (TDS Recon) with fully installed user software OTT Hydras 3 LT Pocket
- or
- User software OTT Hydras 3 LT Pocket without hardware for installing on your own Pocket PC

## Parameterization and calibration

- Convenient setting of operating parameters of Hydrolab multi-parameter probes
- Calibration of individual parameters

## Recording data

- Real-time monitoring (time series, depth profiles, manually controlled recording)
- Fast setup of log files

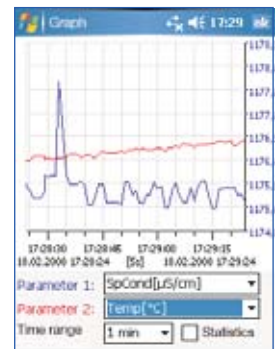

## Displaying data

- Graphical
- Tabular

## Exporting and processing data

- Communication software, e.g. OTT Hydras 3 Basic
- Freely configurable .txt file

## Accessories for the Pocket PC (TDS Recon)

- GPS extension
- Carrying case

**OTT** – Your partner for:

- Water level measurement in ground and surface water
- Discharge measurement
- Precipitation measurement
- Water quality measurement
- Data management and communication
- HydroService: consulting, training, installation and maintenance
