

ISE Ammonia Sensor for Hydrolab Water Quality Sondes

ISE Ammonia Sensor for Hydrolab Sondes. ISE is a reference electrode immersed in a solution of fixed ion concentration separated by a membrane containing a chemical compound that reacts with the ion of interest, measuring electrical potential that varies with concentration.

| Ammonia Sensor | |
|----------------|------------------------------|
| Range | 0 250 mg/L-N |
| Accuracy | Greater of ± 10% of reading, |
| | or ± 2 mg/L-N |
| Resolution | 0.01 mg/L-N |
| Max Depth | 15 m |
