

Self-cleaning turbidity water quality sensor from Hydrolab

Hydrolab sondes use a self-cleaning turbidity sensor that measures from 0 to 3000 NTU and includes a user-programmable cleaning system to remove fouling or debris that could potentially affect readings.

Turbidity Sensor	
Range	0 ... 3000 NTU
Accuracy	$\pm 1\%$ up to 100 NTU, $\pm 3\%$ from 100 ... 400 NTU, $\pm 5\%$ from 400 ... 3000 NTU
Resolution	0.1 NTU from 0 ... 400 NTU; 1 NTU for >400 NTU
